

Some non-verbal reasoning questions involve looking for shapes within other shapes (for example, hidden shape and combined shape questions).

Hidden picture puzzles require you to find small objects within a larger picture. It is important to relax as you attempt these questions, as this will help to develop your observational skills.

1. Look at the picture below. How many different shapes can you find within it?

2. How many rectangles can you find in the shape below? Look carefully.

2. There are 14 rectangles (shown in purple below).
