

# All the times table facts

The questions on this and the next two pages contain lots of times table facts. Fill in the answers.

Time yourself to see how quickly you can complete them.

When you finish the page, write your time on the stopwatch below.

Write all the table facts that you know which have the number **24** in them.

$$\begin{array}{l} \square \times \square = 24 \\ \square \times \square = 24 \\ \square \times \square = 24 \\ \square \times \square = 24 \\ \square \times \square = 24 \\ \square \times \square = 24 \end{array}$$

$$\begin{array}{l} 24 \div \square = \square \\ 24 \div \square = \square \\ 24 \div \square = \square \\ 24 \div \square = \square \\ 24 \div \square = \square \\ 24 \div \square = \square \end{array}$$

Now do the same for the number **36**.

$$\begin{array}{l} \square \times \square = 36 \\ \square \times \square = 36 \\ \square \times \square = 36 \\ \square \times \square = 36 \\ \square \times \square = 36 \end{array}$$

$$\begin{array}{l} 36 \div \square = \square \\ 36 \div \square = \square \\ 36 \div \square = \square \\ 36 \div \square = \square \\ 36 \div \square = \square \end{array}$$

Here's another one to try.

$$\begin{array}{l} \square \times \square = 48 \\ \square \times \square = 48 \\ \square \times \square = 48 \\ \square \times \square = 48 \end{array}$$

$$\begin{array}{l} 48 \div \square = \square \\ 48 \div \square = \square \\ 48 \div \square = \square \\ 48 \div \square = \square \end{array}$$

Write the answers to these word problems.

Zain plays **7** games of chess each week. How many games will Zain play in **7** weeks?

Amelia also plays chess. She plays **2** games on Saturdays and **3** games on Sundays. How many games does Amelia play in **9** weeks?

Time taken:
