

UNIT 14 Understand ratio and use a:b notation

Key point

A **fraction** compares a part with the whole.

2 questions correct out of 7 questions is the fraction $\frac{2}{7}$.

Ratio compares parts of the whole with each other.

2 questions correct and 5 questions wrong is the ratio 2:5.

Ratio is used to describe **relationships between parts**, for example, 'for every 2 questions correct, there are 5 wrong' or 'for every 3 girls in the room there are 4 boys'. These are written as 2:5 and 3:4.

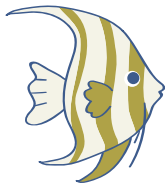

Get started

- 1** Given that $\frac{2}{5}$ of this shape is gold, what is the ratio of gold parts to white parts?
gold : white
 : 
- 2** On this necklace $\frac{5}{8}$ of the beads are gold. What is the ratio of gold to white beads?
gold : white
 : 
- 3** If 1 out of 5 of the children in a room are girls, what is the ratio of girls to boys?
girls : boys
 :

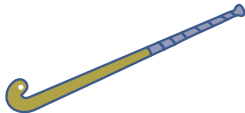

- 4** Write the ratio of gold stars to white stars.
 : 
- 5** What fraction of the stars in question 4 are gold? _____
- 6** What is the ratio of gold parts to white parts in this square? : 
- 7** Give the ratio of gold to white sweets.
 : 
- 8** What fraction of the above sweets are white? _____

Now try these

- 9** Colour this grid so that the ratio of coloured to white squares is 4:5. 
- 10** True or false? If one-quarter of these bottles are full and the rest are empty, the ratio of full bottles to empty bottles is 1:4. True False 
- 11** For every gold section of this pattern there are two white sections. Circle which shows the ratio of gold to white sections.
1:3 2:1 1:2 
- 12** A wall has blue and green tiles. For every 4 blue tiles there is 1 green tile. blue : green
 :

- 13** An ice cream shop sells 3 scoops of vanilla ice cream for every scoop of caramel ice cream. Write this as a ratio of vanilla to caramel scoops. _____ 
- 14** A shop has a 'buy two, get one free' offer. Write the ratio of paid for items to free items. _____
- 15** A class of children get into seven equal groups. Three of the groups are all girls. The rest of the groups are all boys. What is the ratio of girls to boys? _____
- 16** Half the people in a room are adults and half are children. Write the ratio of adults to children. _____
- 17** There are ten fish in a fish tank. Three are angel fish and seven are guppies. 
- a) What is the ratio of angel fish to guppies? _____
- b) What fraction of the fish are angel fish? _____
- 18** The ratio of pens to pencils in a pencil case is 5:6. What fraction of the items are:
- a) pens? _____ b) pencils? _____

Challenge

- 19** One-third of a team's matches were won. The rest were lost. What was their 'win : lose' ratio? _____
- 20** In a hockey match 7 out of the 12 shots at the goal were on target. What was the ratio of shots on target to shots not on target? _____ 
- 21** The instructions for a drink say to use squash to water in the ratio 1:6. What fraction of the mixed drink is water? _____
- 22** A factory makes different coloured sweets. $\frac{1}{8}$ of the sweets are blue. For every 2 blue sweets there are 3 red sweets. Write the ratio of: a) blue to not blue sweets. _____ b) red to blue sweets. _____
- 23** For every £2 Ali saves his dad gives him £3 more. What fraction of the money altogether comes from his dad? _____
- 24** Circle the two fractions that could be used to describe the ratio 1:9. 
- $\frac{3}{9}$ $\frac{1}{10}$ $\frac{5}{9}$ $\frac{9}{10}$
- 25** Circle the two fractions that could be used to describe the ratio 4:5. 
- $\frac{5}{8}$ $\frac{4}{5}$ $\frac{5}{9}$ $\frac{4}{9}$ $\frac{5}{4}$
- 26** If 30% of a group of children are girls, what is the ratio of girls to boys? _____
- 27** In bowl A the ratio of green olives to black olives is 20:10. In bowl B the ratio is 2:1. For each bowl, write the fraction of black olives in its simplest form. a) bowl A _____ b) bowl B _____
- 28** Oscar makes scones using the ratio 3:2:1 of flour to butter to sugar. What fraction of the mixture is:
- a) flour? _____ b) butter? _____ c) sugar? _____
