

# Contents

<b>Paper 15</b>	Writing large numbers; Decimal addition and subtraction; Decimal multiplication; Decimal problems; Venn diagrams; Fraction problems; Factors and multiples; Money problems; Measures addition and subtraction; Reduce to lowest terms; Capacity problems; Time = distance $\div$ speed; Graphs; Volume; Sequences; Ratio; Angles and degrees; Square numbers and roots; Symmetry; Proportion	4
<b>Paper 16</b>	Simple addition and subtraction; Simple division; Multiplication problems; Long multiplication; Translation; Decimal division; Magic squares: fractions; Long division; Coordinates; Percentage problems; Measures multiplication and division; Using money; Money problems; BODMAS; Time problems; Triangles; Division with remainders; Probability; Volume; Symmetry	11
<b>Paper 17</b>	Measures addition and subtraction; Money problems; Length problems; 24-hour clock; Fractions and decimals; Measures multiplication and division; Compass points; Scale; Distance = speed $\times$ time; Shape properties; Triangles; Percentage problems; Nets; Mean, median, mode and range; Unequal sharing; Decimal long multiplication; Decimal long division; Number lines; Algebra; Reduce to lowest terms	18
<b>Paper 18</b>	Timetables; Division problems; Fraction multiplication and division; Large number problems; Fractions to percentages; Number lines; Probability; Mass problems; Length problems; Shape properties; Speed = distance $\div$ time; Divisibility rules; Magic squares; Capacity problems; Perimeters; Area problems; Negative numbers; Area of shapes; Venn diagrams; Currency conversion	25
<b>Paper 19</b>	Pie charts; Writing large numbers; Decimal multiplication; Algebra; Area problems; Measures addition and subtraction; Using money; Coordinates; Money problems; Fractions to percentages; Graphs; Time problems; Time = distance $\div$ speed; Ordering decimals; Negative numbers; Sequences; Proportion; Ratio; Angles and degrees; Volume	32
<b>Paper 20</b>	Rounding; Fraction addition and subtraction; Measures conversion; Magic squares; Area of shapes; Long division; Greater, equals and less than; Scale; Money problems; Estimation and approximation; Ordering fractions; Division with remainders; Factors and multiples; Percentage problems; Distance = speed $\times$ time; Time problems; Mean, median, mode and range; Nets; Roman numerals; Fraction multiplication and division	39
<b>Paper 21</b>	Timetables; Multiplication problems; Large number problems; Symmetry; Decimal division; Reduce to lowest terms; Length problems; 24-hour clock; Algebra; Mass problems; Magic squares: fractions; Unequal sharing; Decimal long division; Decimal long multiplication; Square numbers and roots; Area of shapes; Measures multiplication and division; Magic squares; Rounding; Number lines	46
<b>Progress chart</b>		52

## Note for parents, tutors, teachers and other adult helpers

A pull-out answers section (pages A1 to A12) appears in the centre of this book, between pages 26 and 27 (Paper 18). This provides answers to all the questions, along with guidance on marking the papers. Remove the pull-out section before the child begins working through the practice papers.
