WriteWell challenge 1 💍

Copy the information as quickly as you can to show off your fastest joined handwriting. Time yourself. Then copy the information in your best joined handwriting, adding a title at the top, as if for a display.

The Venus flytrap is a unique plant. While most plants get their food from the soil and sunlight, the Venus flytrap is a carnivore that eats living things. It even catches its own food. This incredible plant attracts small insects into its jaws, which then snap shut to imprison the prey. Time min
